

## Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2024.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the AMP Conservative Managed Fund are charged fund charges. Our estimate of the fund charges as at 31 March 2024 are:

	% of net asset value
<b>Total fund charges (estimated)<sup>2</sup></b>	0.80%
Which are made up of -	
<b>Total management and administration charges (estimated)</b>	0.80%
Including -	
Manager's basic fee	0.75%
Other management and administration charges (estimated) <sup>3</sup>	0.05%
<b>Total performance-based fees</b>	0.00%
<b>Other charges</b>	<b>Dollar amount per investor or description of how charge is calculated</b>
NIL	

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'Other Material Information' document on the entry relating to the offer of interests in the AMP Managed Funds maintained on the offer register ([disclose-register.companiesoffice.govt.nz](https://disclose-register.companiesoffice.govt.nz)) for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

## Example of how this applies to an investor

Craig had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Craig received a return after fund charges were deducted of \$580.00 (that is 5.80% of his initial \$10,000). Craig also paid \$0.00 in other charges. This gives Craig a total return after tax of \$580.00 for the year.

## Notes

- 1 As the fund started on 18 May 2022, actual returns for the last five years are not available. To calculate the risk indicator for the five year period up to the date of this fund update, a combination of market index returns and actual fund returns have been used where relevant. We consider this to be the most appropriate way to calculate the risk indicator, but as a result of this calculation, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund than it would if actual returns for the last five years were able to be used.
- 2 The total fund charges are inclusive of any applicable GST.
- 3 The other management and administration charges include estimates of underlying fund charges provided by underlying fund managers.
- 4 The actual investment mix and top ten investments have been calculated excluding cash and cash equivalents held for operational purposes.
